Art Unit: 1635

Election/Restrictions

The following restriction supercedes the restriction requirement mailed 10/01/03. Upon a review of the claims after applicants election to the restriction filed 12/01/03 it was deemed appropriate to further restrict the claims. Any inconvenience to the applicant is regretted.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claim96-115, 117, and 119-122, drawn to a method of synthesizing an RNA oligonucleotide in a cell, classified in class 435, subclass 91.21 and 91.31.
- II. Claims 96, 97, 99-116, 118, 119, 120, 122, and 123, drawn to a method of nucleic acid based treatment in an animal, classified in class 514, subclass 44.
- III. Claims 96, 97, 100-115, 117, 122, and 123, drawn to a method of RNA expression in a plant, classified in class 800, subclasses 278 and 285.

Group I is subject to the species requirement set forth in the Official Action mailed 10/1/03.

Claim 95 link(s) inventions I-III. The restriction requirement between the linked inventions is subject to the nonallowance of the linking claim(s), claim 95. Upon the

Application/Control Number: 09/997,931

Art Unit: 1635

allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 96 and 100-115 are generic to Groups I-III and claims 97, 116, 118, 119, 122, and 123 are generic to Groups II and III. These claims will be examined limited to the subject matter elected.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04; MPEP § 808.01). In the instant case the different inventions the instant methods have different functions effects and modes of operation. The method of group II is drawn to a method of treating an animal which could not be treated by the method of expressing and RNA in a plant

Application/Control Number: 09/997,931

Art Unit: 1635

cell or a bacteria, for example. One would need to use different method steps to achieve the ends of the different methods, for example. One could not achieve the expression of a circular template in a bacteria using a plant cell of an animal cell, for example. The different methods require materially different method steps in order to practice the restricted inventions where the practice of the methods result in different ends, such as the treatment of a disease in an animal, the inhibition of a virus in a plant and the expression of an RNA multimer in a bacteria, for example.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sean R McGarry whose telephone number is (571) 272-0761. The examiner can normally be reached on M-Th (6:00-4:30).

Application/Control Number: 09/997,931 Page 5

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John LeGuyader can be reached on (571) 272-0760. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
